To,
The Recruiting Team
Deloitte Consulting India Private Limited
Bengaluru / Hyderabad / Pune / Chennai

Subject: Application for Full Stack Development - NextJS - Managed Services Engineer I (Requisition Code: 353063)

Dear Hiring Committee / Recruiting Team,

I am writing to express my strong interest in the Full Stack Development - NextJS - Managed Services Engineer I position at Deloitte Consulting, under the Digital Foundry Operate & Innovations (DFO&I) - Customer group. With over 1.3 years of experience as a Full Stack Developer at Savayas Life and Balance, coupled with a deep specialization in Next.js 15, React 19, and scalable API/operations management, I am confident in my ability to deliver high-quality digital products and manage ongoing services that elevate customer value at Deloitte.

During my tenure at Savayas Life and Balance, I successfully developed, optimized, and maintained two production-grade web applications using **Next.js and React**. I have extensive hands-on experience with Next.js rendering strategies (SSR, SSG, ISR), dynamic routing, and caching mechanisms. In one of my key performance optimization initiatives, I improved the company's **Core Web Vitals scores by 40%** by leveraging runtime optimizations, bundle split techniques, and asset lazy-loading. Furthermore, my development workflows strictly align with accessibility standards, enabling me to achieve a **92% accessibility compliance score** using semantic HTML and WCAG 2.1 / ARIA patterns.

Quality assurance and robust system integrations form the core of my development practices. I am highly proficient in writing unit and integration tests using **Jest and React Testing Library**. I regularly integrate frontends with **RESTful and GraphQL APIs**, secure user authentication patterns using JWT and OAuth/OIDC, and state management solutions. In addition, I am well-versed in Git workflows and CI/CD pipelines, and I regularly use GenAI tools like **GitHub Copilot** to accelerate feature delivery while maintaining strict secure coding practices and intellectual property rules.

The 'Managed Services' nature of this role perfectly aligns with my cross-functional skill set. Alongside my development capabilities, I possess practical experience in systems engineering, including **Docker containerization, automated infrastructure management using Ansible, and Linux server operations**. This dual capability as a Full Stack Developer and Systems Specialist allows me to not only build premium web applications but also troubleshoot production incidents, conduct Root Cause Analysis (RCA), and ensure long-term platform reliability and uptime.

Deloitte's inclusive culture and focus on professional growth and making an impact that matters resonate deeply with me. I am excited about the opportunity to collaborate with your multidisciplinary teams of engineers, strategists, and designers to solve complex business problems. Thank you for your time and consideration. I look forward to the opportunity to discuss how my qualifications align with your team's objectives.

Sincerely,
Navneet Vishwakarma
